

#### State of the Map 2019

# Integrating and validating open data in OSM using street pictures

September, 23th 2019

## **OPEN DATA**

Qualitative...

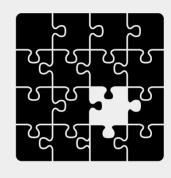

or Messy?

#### **OPENSTREETMAP**

Rich attribute model

No guaranty on exhaustivity

## STREET PICTURES

Geolocated

Many details

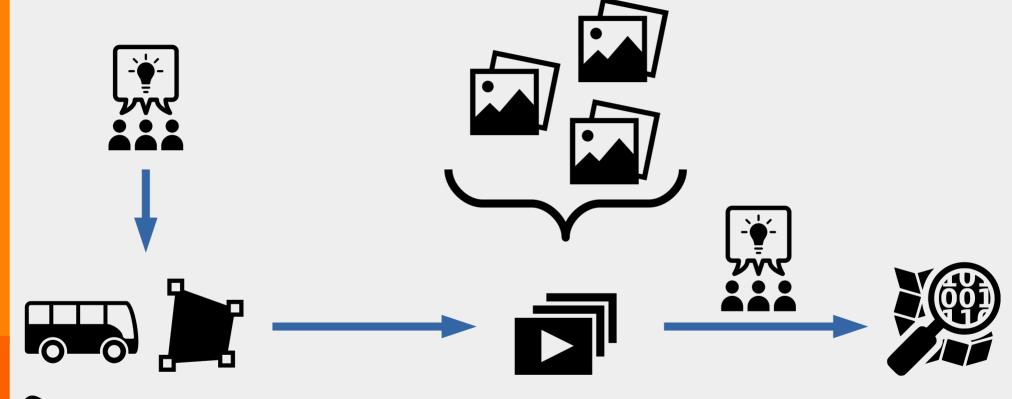

How to combine all of this to get best of both worlds?

## THE IDEAL PROCESS

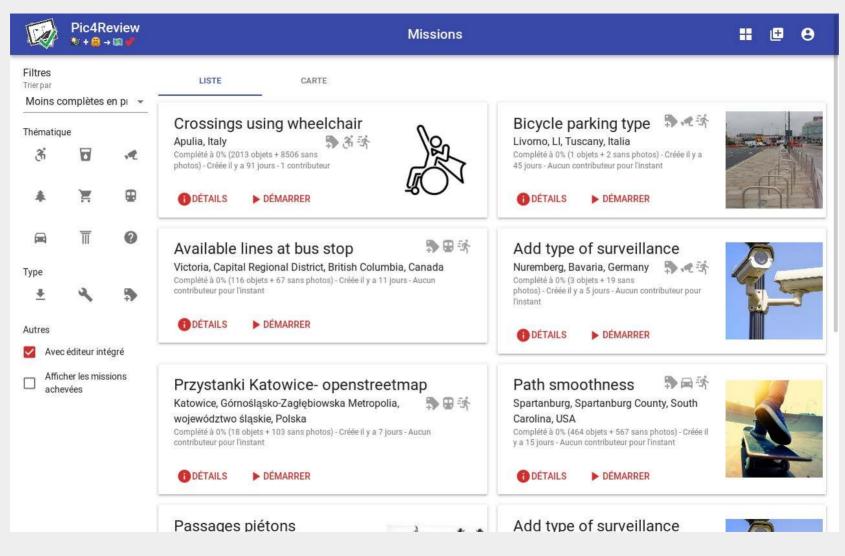

#### PIC4REVIEW!

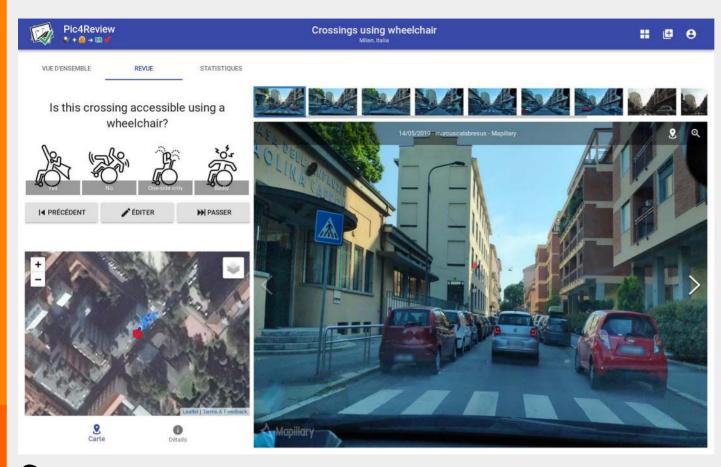

https://pic4review.pavie.info/

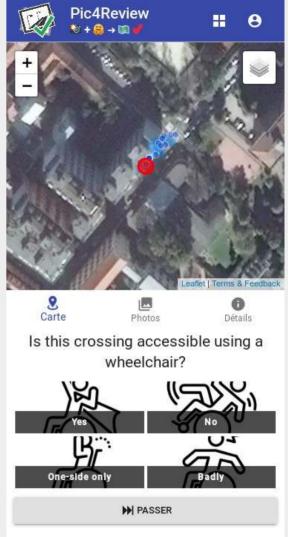

https://framagit.org/Pic4Carto/Pic4Review

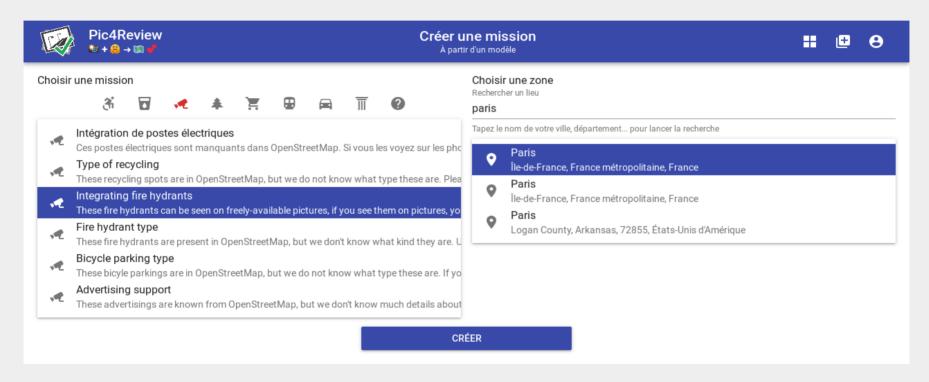

#### **CREATE YOUR OWN MISSIONS**

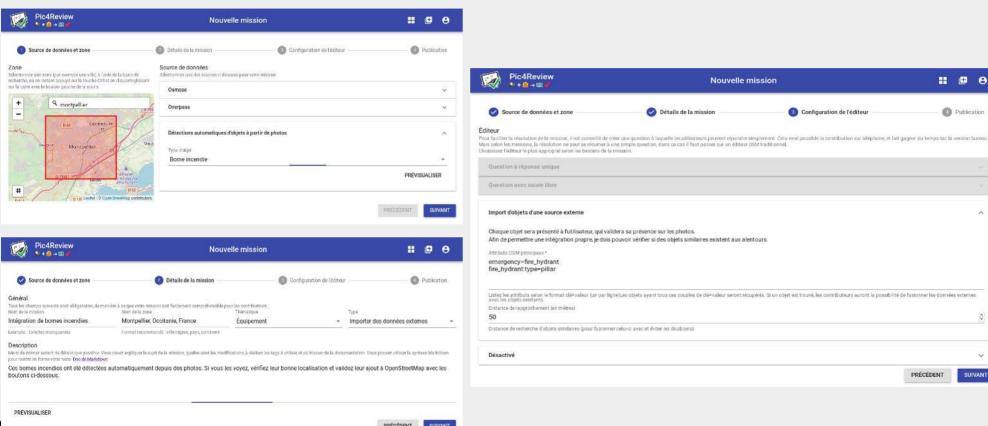

# From a template

#### **CREATE YOUR OWN MISSIONS**

#### From scratch

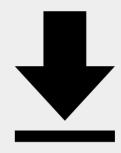

#### **CONTRIBUTING MODES**

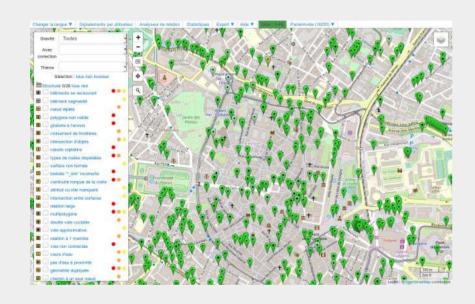

Complete existing OSM data

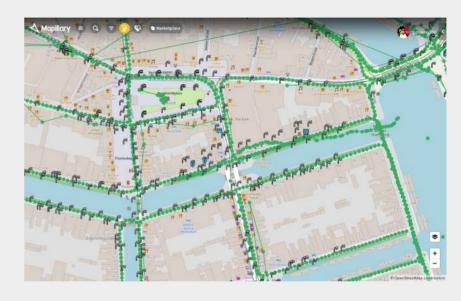

Import from open data

#### **DATA SOURCES**

Open data available in Osmose

#### **DATA EXAMPLES**

Fire hydrants

Street lights

Manholes

Traffic signs

Power stations

Post boxes

Bicycle parkings

Disabled parkings

Recycling containers

• • •

#### LIVE DEMO!

# Power substations in Val de Loire (France)

https://pic4review.pavie.info/#/mission/786/review

#### **STATISTICS**

- 2800 fire hydrants Added or improved worldwide
- 11400 pedestrian crossings Added or improved worldwide
- 740 power substations Added or improved in France

Outlooks

#### LET'S GO FURTHER

- Extend to all open datasets
  - Convert original attributes into OSM tags?
  - Use semantic web?
  - Direct exports from open data portals into OSM XML format?

#### LET'S GO FURTHER

- Improve data before publishing
  - Pic4Review for internal uses?
  - Store improved data into closed databases?

#### HELP US BUILD A BETTER TOOL

Translation

User feedbacks

Development / design

#### **CONCLUSION**

Get the best of open data & OpenStreetMap

• Pictures make data verifiable

Start of an amazing data journey!

# Quality is never an accident. It is always the result of intelligent effort.

John Ruskin (writer, painter)
